

SUPERFAN

INTERACTIVE
EXPERIENCE

BRAINSTORM

come up with three different ideas of themes + interactive features

PHASE 0

Idea 2: School subjects

Theme

A lot of possible topics and I can get the info here easy

Interactive JS Feature #1

Interactive JS Feature #2

Interactive JS Feature #3

Shows the teacher

A description of the teacher from the davinci website or other students

List of all the Pros and Cons of the class

Idea 3: The types of food

Theme

I am fat so I am knowledgeable about food and I can get info by anyone as well as the fact that there are a lot of thing to do with food

Interactive JS Feature #1

Interactive JS Feature #2

Interactive JS Feature #3

A picture of that type of food

The list of the foods, kind of like a menu but of what that topic of food consists of

The rating of that type of food out of ten from 10 random students

EVALUATE

think about the good and bad for each idea then choose one

PHASE 1

Evaluate + Choose Your Idea

Soccer players

	Pros	Cons
Idea 1: Soccer players	Their are a lot of soccer players and almost all the information is on the internet	I will not be able to include all the information about them
Idea 2: School subjects	Its here at school and its opinion based too	Its a really boring idea
Idea 3: Types of food	A lot of information about it and everyone is interested in it, and it's easy to get the information	Not everyone will agree on the ratings

CONTENT

gather and edit essential content for your site

PHASE 2

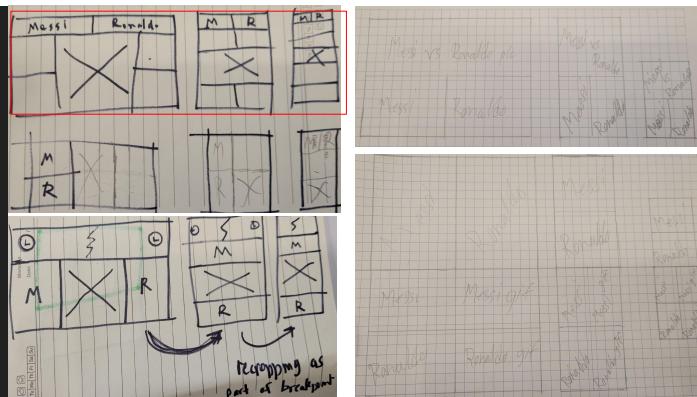

Save images on your computer or in your Google Drive to maximize quality!

You want to see the exact shapes of your images to help understand the best possible layouts!

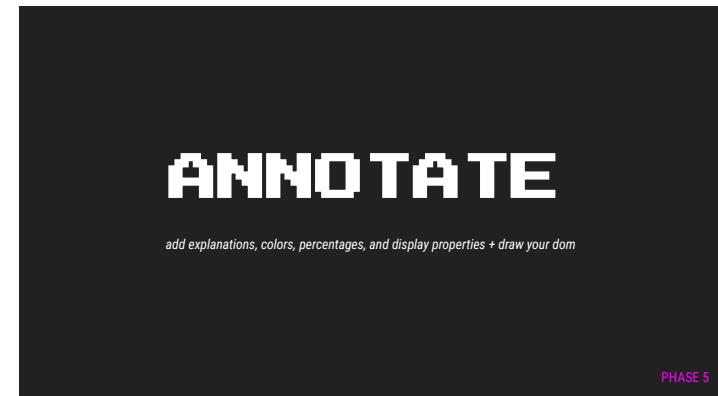

DESIGN

create three possible responsive designs for your chosen idea

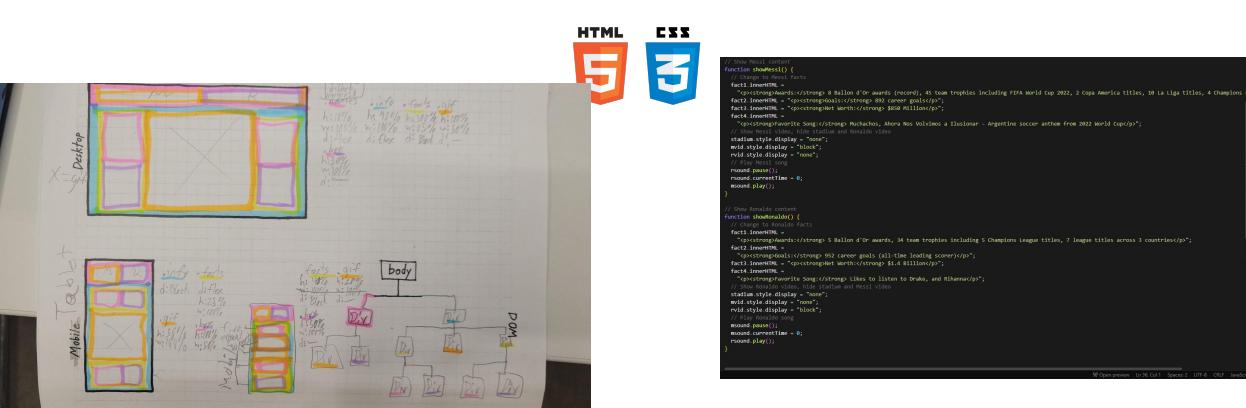

MOCKUP

choose your final layout and create a digital mockup

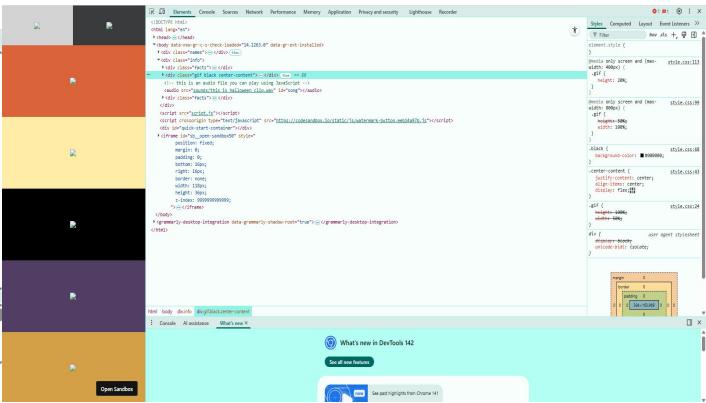

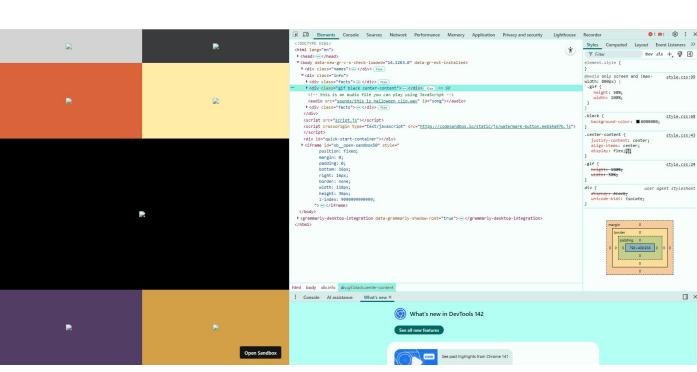

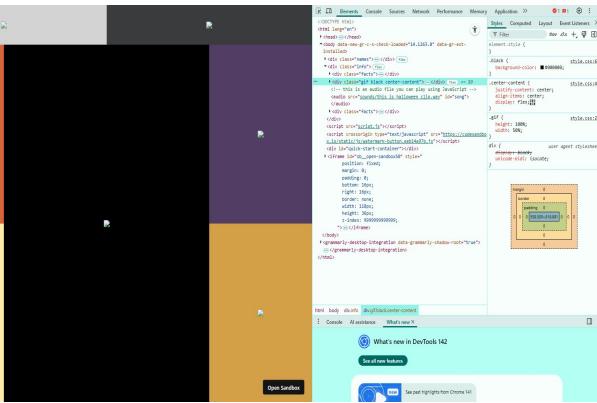

ANNO TATE

add explanations, colors, percentages, and display properties + draw your dom

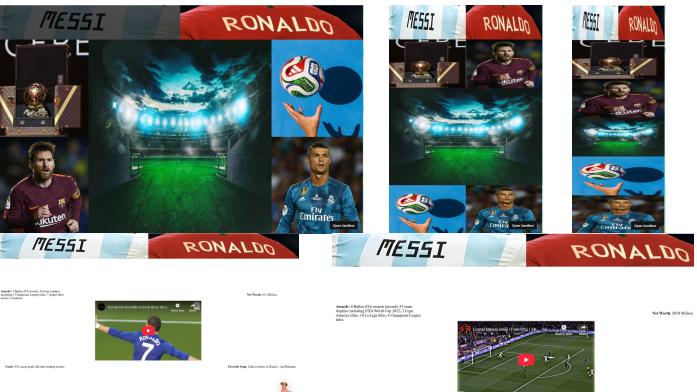

Create your desktop divs using HTML and CSS then make it responsive.

CONTENT

insert all images and text into your site

JAVASCRIPT

add behavior to your page by inserting two pieces of javascript

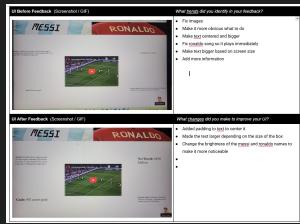

ENHANCE UX

add in effects when the user hovers and clicks to make the page intuitive and fun

TEST + ITERATE

get feedback from users then make revisions to your user interface

PHASE 10

User Interface:	How could the styling of elements be changed to make a more visually appealing, clean, and user friendly site?	User Experience:	What elements of the user experience could be improved to make the page more inclusive and more user friendly ? (e.g., colors, fonts, alignment, etc.)
User 1 Name: Xavier (aka Wire Kid)	<ul style="list-style-type: none"> Make sure that the facts are bigger Make sure the text is centered 	<ul style="list-style-type: none"> Cut the song for intro by the entire intro or tell people to wait like 45 seconds ... 	
User 2 Name: Mark Gutierrez	<ul style="list-style-type: none"> Make the logo not clutter Make sure bigger and centered 	<ul style="list-style-type: none"> Somewhat make it more obvious (p) what you can click ... 	
User 3 Name: None	<ul style="list-style-type: none"> "Use clutch to make us site better out its pop up?" Nathaniel Castillo 	<ul style="list-style-type: none"> "It just had give us edit access and we will make it better" Nathaniel Castillo ... 	
User 4 Name: Chief (Grendene)	<ul style="list-style-type: none"> Bigger word Change the font Change the font size Change the font color 	<ul style="list-style-type: none"> Editable video player something sound file too long Music file in the middle of the video player Add one song at a time 	
User 5 Name: JW (My brother)	<ul style="list-style-type: none"> The photo view images are so stretched White space background is too big and plain with overall text 	<ul style="list-style-type: none"> Add a section or click to make more satisfying Make images blend together more on bottom page Make login button to home page
